MarShield manufacturers **standard** and **custom-designed** radiation shielding barrier as portable or stationary units. These full body shielding barriers are designed to shield medical personnel from harmful secondary radiation in examination rooms, operating rooms, intensive or cardiac care units, and nuclear medicine suites, as well as industrial applications, including welding, uranium production and nuclear. They are excellent for imaging procedures using ionizing radiation such as fluoroscopy, x-ray, CT and mammography.

MarShield Radiation Shielding Barriers incorporate clear viewing *safety lead glass panels in the top with a solid opaque panel in the bottom, both of varying sizes. The optically clear *safety lead glass panel is durable and shatter resistant while offering a wide field of view. The solid panel is constructed of a single unpierced sheet of pure lead 99.9% of desired thickness laminated between two steel panels or optional ABS Plastic (washable). All models can be made with one full length solid opaque panel or a full length *safety lead glass view panel.

*Safety Lead glass meets requirements of ANSI Z97.1-1984 & 16 CFR 1201 Cat. II. Safety lead glass consists of lead glass, interlayer and float glass in a laminated sandwich.*
RADIATION BARRIERS

KEY FEATURES AND BENEFITS:
- Laminated safety lead glass panels are durable and shatter-resistant, or optional lead acrylic, both offering a wide field of view with full-protection.
- All shields and barriers are balanced for stability with heavy duty outrigger-type legs.
- Mobile units are supplied with smooth rolling, heavy duty swivel casters, easily locked into position when required.
- All rolling models are equipped with removable casters that allow the end user to easily modify them to stationary barriers so they can be fastened directly to the floor.- Requires only a slight modification.
- Professional engineering and custom on-site design services available. We can work with you to design a custom solution in a virtual CAD environment.
- Reduce exposure from harmful radiation
- Maintain a healthy and safe work environment
- Custom designed and manufactured to your exact specifications.
- Easy to relocate and store when not in use
- No assembly required.
- Full CAD approval drawings provided for each order

STANDARD MODELS
- All standard barriers are 75" high, 1.6mm lead equivalency, portable on castors.
- Frame and Bottom Opaque Panel Color: Beige/tan (Powder coat finish)
- View Panel is Safety Lead Glass (Laminated glass with interlayer. This Safety lead glass is shatter resistant glass that meets requirements of ANSI Z97.1-1984 & 16 CFR 1201 Cat. II)
- Barriers are mounted to Four Heavy Duty Swivel Locking Casters.
- Warranty: 1-Year standard warranty

## Standard Models Continued

### MSS72-2448-1.6-SP
- **Width**: 72”
- **Window Height**: 24”
- **Bottom Panel Height**: 48”
- **Style**: Standard

### MSS72-3636-1.6-SP
- **Width**: 72”
- **Window Height**: 36”
- **Bottom Panel Height**: 36”
- **Style**: Standard

### MSS72-4824-1.6-SP
- **Width**: 72”
- **Window Height**: 48”
- **Bottom Panel Height**: 24”
- **Style**: Full View

### MSS72-0072-1.6-FOP
- **Width**: 72”
- **Window Height**: No Window
- **Bottom Panel Height**: 72”
- **Style**: Full Opaque

## Options:
- Custom Widths & Heights available
- Alternative Lead equivalency to meet your requirements for up to ½ inch of raw lead (Solid opaque panels only).
- Special Colors or finish – Wide selection of finishes is available to suit your environment, application or architectural specs – we offer a wide-variety of colors to match any décor.
- Optional colors are subject to longer delivery times.
- Stainless Steel Construction
- Small View Window Lites
- Lead Acrylic View Window
- Anti-microbial finishes available, including light-weight, durable anti-microbial ABS plastic facings and anti-microbial paint. Many bio-hazardous contaminants can be washed off of anti-microbial surface within 48 hours with mild soap and water. For example: blood, urine, barium and iodine.
- Push Handles
- Floor Locks
- Non Marking Casters
- Export Crating
- Base Skirts
- Units can be designed to easily combine, stack or nest to increase lead equivalency or create a temporary lead-lined room.
