

Custom Radiation Protection, Shielding & Storage Solutions

RADIATION BOOTHS/VAULTS

Versatile, Rolling Booths and Vaults

MarShield rolling radiation shielding vaults offer full radiation protection and can be built to exact lead equivalency. The versatility and mobility of the MarShield rolling booths and vaults provide a safe workspace for the operator in any application, including military, industrial non-destructive testing, medical and aviation.

KEY FEATURES

- Made with ASTM B-29 pure lead, 99.9%.
- Lead is fully encapsulated.
- Versatility accommodates a wide range of applications.
- Three-sided lead-lined units or four-sided with door.
- Designed with a wrap-around push handle for easy maneuvering.
- Built to last. Frame has a solid steel design and comes with a lifetime warranty.
- Durable wheels offer mobile radiation protection by allowing the operator to roll the enclosure to the desired location.
- Designed with step-down floor locks to quickly and easily lock into position.

BENEFITS

- Reduce exposure to harmful radiation
- Provide a healthful and safe work environment
- Easy to move and relocate
- Customized to suit your individual application, based on architectural specs or a custom concept we help you create.
- Professional engineering and custom on-site design services available. We can work with you to design a custom solution in a virtual CAD environment.
