

# T-Flex® Shielding

blankets

An alternative to lead blankets, similar attenuation characteristics without the lead hazard. T-Flex Blankets can be cut in the field using a utility knife, but can stand up to normal wear and tear. Increased flexibility over a standard lead blanket allows for wrapping shielding closer to the source and easier handling characteristics.

Material	Size	lb/ft <sup>2</sup>	Attenuation	Weight
T-Flex® Tungsten	1' x 3'	10	19%	30 lb
T-Flex® Tungsten	1' x 3'	15	27%	45 lb
T-Flex® Tungsten	1' x 4'	10	19%	40 lb
T-Flex® Tungsten	1' x 4'	15	27%	60 lb
T-Flex® Bismuth	1' x 3'	10	20%	30 lb
T-Flex® Bismuth	1' x 3'	15	29%	45 lb
T-Flex® Bismuth	1' x 4'	10	20%	40 lb
T-Flex® Bismuth	1' x 4'	15	29%	60 lb
