

MODULAR X-RAY SHIELDING ROOMS FOR TEMPORARY HOSPITAL SITES

As we continue to tackle COVID-19, now more than ever the medical industry requires modular x-ray shielding rooms. These full body shielding units are designed to protect medical personnel from harmful secondary radiation and can be used either at a hospital or an outdoor clinic.

MarShield is a leading North American manufacturer of custom [modular x-ray shielding rooms](#) that protect all stakeholders and ensure a safe workplace environment. Our units are ideal for temporary situations as they can be installed in less than a day and be moved around and set up in modular spaces.

KEY DESIGN AND CONSTRUCTION FEATURES

Our modular x-ray shielding rooms provide industry-leading features for our customers:

- Panels extended from floor to 84", 96" or higher, ensuring effective protection
- Your choice of lead shielding thickness
- Solid panels are lead-lined and faced with beige ABS
- Frames are sturdy, beige powder-coated steel
- Sliding doors complete with hardware available
- Windows available in door or wall panels
- Windows are Lead Safety Glass (Laminated glass with interlayer. This

Safety Lead Glass is shatter-resistant glass that meets the requirements of ANSI Z97.1-1984 & 16 CFR 1201 Cat. II)

- Wall panels are prefabricated for ease of installation

BENEFITS

MarShield's modular x-ray rooms are quick, clean and easy to install. There is no demolition required and the rooms feature attractive neutral décor with clean lines.

Additional benefits include:

- Durable solid lead-lined panels and solid steel frame are built to last
- Customized to suit your application, based on architectural specs or a custom concept we help you create. All units can be sized and manufactured to your requirements
- Professional engineering and custom on-site design services available. We can work with you to design a custom solution in a virtual CAD environment
- Designed to accommodate future modifications and expansions. Can be removed and/or relocated, if required
